WOOLEN MILLS ARE AGGRESSIVE BUYERS

Boston Wool Market Generally Easier; Shearing Is Being Held Up in Arizona; Prices Remain Same in West.

BOSTON, Feb. 18.—Conditions are certainly as good as it was a week ago, some think better, at least that is pretty much of no new opinion. The woolen mills are the most aggressive buyers at the moment, although their purchases, of course, do not take care of most requirements. However, more and more suitable for French spinning purposes has come in, and at very late prices.

Generally speaking, the market is what the eastern side—considering the business which is being done. The buyers of medium lots of wool are being obliged to shade prices, while the larger comers into market for their goods. Holders who try to force the market up the price of their wool are obliged to take a loss for their wool, says the Boston Commercial Bulletin.

The Eastern Workers' Strike. The situation among the striking garment workers of the country reported an improvement improved, although it is still much or less improvement as to the length of time before which the strike will finally be settled. With the return of some 6,000 more workers to New York, the strike has been broken, leaving only about 2,000 more men out. This adjustment of the dispute with more hope than do the members of the wool trade. Reporters are certain that most of the wool workers at Lawrence have been to work again.

The Goods Situation. Manufacturers of woollens are apparently having a good trade and are not anxious to market for supplies, which they had shipped the double source. These goods made and exported men's wear fabrics.

\$100 NEW BED, \$800.

The readers of this paper will be pleased to learn that there is at least one disease that science has been able to cure in all its stages, and that is Hansen's Disease. Catherin Cure is the only positive cure now known to the medical fraternity. Catherin being a constitutional disease, requires a constitutional treatment. Hansen's Disease is taken internally, acting directly upon the blood and mucous membranes of the system, thereby destroying the composition of the disease, and giving the patient strength to continue on the constitution and assisting him in doing his work. The practitioners have so much faith in its curative powers that they offer One Hundred Dollars for any cure that it fails to cure, send for a list of test-moneys.

RUGS

Spring is here, which means house furnishing time. You'll want a new rug for your living room, or perhaps one for your dining room.

WE GAVE THEM.

A large Selection of Standard Sizes at prices that will appeal, including:

ROYAL BRUSSELS
WILTON
ARMSTRONG
TAPESTRY
WOOL and FIBRE

STRONG BROS.
Furniture and Crockery
Second and Copper.

Trading here in greasy pelts, wool and other products in the market, however, indicate that dealers there have shaved some of their 10% margin to effect sales, the clean cost of a conservative lot being estimated at around fifty cents.

Terribles.

Further observations: Women's wear have been mention in the news, and in some instances prices are named that are on a parity with years ago. Considering the advance in raw materials, the goods trade are wondering just what the meaning of this phenomenon is, especially since manufacturers are themselves cutting the fabrics in order to get a lower manufacturing cost.

The small stores appear to have either better business with the advent of the recent more severe weather.

Further Wool Exports. In addition to the shipment on February 4 of 1,428 bales of consular wool, which we reported last week, there were 1,000 bales sent to London on the King Edward; these were shipped last Saturday by the Canadian, bound to Liverpool, 27 bales, and yesterday the Sachem, also for Liverpool, took out 600 bales of Australian wool, supposedly 54 merinos. Offers on another lot of 1,600 bales or more of merino of this grade are also reported under negotiation with good results, according to the trading documents.

Trade in Texas wools this week, except for scoured lots which have sold in the range of 45¢-50 cents, has been dull.

California.

There has been but little business reported in California wools this week.

Southern.

Demand for consular wools has been fair this week, and quotations have been on last week's basis. The woolen mills are steady buyers for small lots and thus the market is not readily sustained except, perhaps, that strictly fine wools are fairly sought.

Norfolk.

Trade in units has continued fair, with prices maintained on the basis reported a week ago.

To Cure a Cold in One Day

Take LAXATONIC HOMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVER'S signature on each box. 25¢.

Donald Weston.

"How much money did he say he had?"
"A thousand."
"Ah! Then he has untold wealth."

Pellets.

\$3.50 RECIPE FREE FOR WEAK MEN

Send Name and Address Today—You Get It Free and Be Strong and Vigorous.

I have in my possession a prescription for nervous debility, lack of vigor, weakened manhood, failing memory and tame hair, brought on by excessive, unnatural drains, or the like for you. I have had many weak and nervous men right in their own homes—without any additional help or medicine—that I think every man who wishes to regain manly vigor and virility, quickly and painlessly, should have a copy. So I have determined to send a copy of the prescription free of charge, to any man who writes me for it.

This prescription contains receipts of medicine that have made a special study of men and I am convinced it is the surest-acting combination for the cure of debilitated manhood and vigor failure ever invented.

I think I owe it to my fellow men to send them a copy, so that they may know that there is a real alternative to what is now known as "Medicinal" when reflected rat-tails may stop drugging himself with harmful potent medicines, when I believe it is the mildest-acting restorative, building SPORTS TOUGHENING remedy ever devised, and secure himself in home quietude and health. Just now I am sending Dr. J. E. Robinson, 4727 Park Building, Detroit, Mich., and I will send you a copy of this special recipe for a plain ordinary envelope free of charge. A great many doctors would charge \$3.00 to \$6.00 for merely writing out a prescription if I can't send it entirely free.

Michigan Fleeces.

Apart from the sale of about 1,000 pounds of quarter-blood Merino and similar wools in this market, there has been very little business done in the woolen goods this class. This lot was sold at 28 cents.

Missouri, Etc.

There has been no business of any moment reported this week in Missouri and similar wools in this market. Supplies, medium to day, are generally exhausted and the few lots remaining are held at very firm rates.

Poultry Raising in Roosevelt County

From the *Portales Herald*.

For the amount of capital required, poultry raising in Roosevelt county offers the city man, the housekeeper or the farmer who sees an opportunity to reap big profits through widespread, high-priced markets for chickens and eggs, the most interesting, promising and profitable business could be acquired.

Roosevelt County needs a large number of poultry raisers to supply numerous which are at present scattered with poultry and eggs by Nebraska and Kansas. "Indians alone import annually over 24,000,000 pounds of poultry meat and eggs, that, for reasons that are evident, should be supplied to the majority within the boundaries of Roosevelt County.

If a practical poultry raiser familiar with the conditions in Roosevelt County should place in two columns the advantages and disadvantages of the business as it may be practiced in this county, he would find that he had a long column of advantages and a column of but one or two items of disadvantage. This is very nearly an ideal country in which to raise poultry; the climate is dry, the winters are short and sunny, so that the hens lay right through the period when eggs are highest priced; we have none of the poultry diseases which are caused by dampness or cold moisture as light and dry as are most of the soil with some exceptions is a warm home; the county receives on an average more than 220 days of sunshine a year; the feed for chickens when it is raised by the poultrymen or bought from the farmers is cheap; the irrigated lands yield huge crops, possessing but a comparative small tract of land to raise an adequate amount of feed.

Another of the great advantages is when coupled with dairying and hog raising there is always a large quantity of waste products, such as skim milk and grains and alfalfa, that means cheap feed for the chickens. The farmer of today is utilizing everything and making one more do the work that he, a few years ago, has done before. The combination of poultry raising with dairying and hog raising, and poultry and bees together with truck gardening and fruit growing, will make any family a good living if no much care and attention is given it as would be given any business representing the same amount of capital.

Another of the great advantages is

the fact that from this source to June 30, 1912, are \$27,612,781.43. The net income of \$1,000,000 paid in reclamation taxes for the western states and territories, excepting the 5 percent of the proceeds of such sales as made by law for educational and other

purposes. The estimated total receipts from this source to June 30, 1912, are \$27,612,781.43. The net income of \$1,000,000 paid in reclamation taxes for the western states and territories, excepting the 5 percent of the proceeds of such sales as made by law for educational and other
